SASEKANI MALULEKE

Data Migration & Reporting Analyst | Data Science, Cybersecurity & Full-Stack Development

Sasekaninkuri560@gmail.com | 083 771 9473 | Kempton Park, Gauteng | Hybrid

GitHub | Data Science Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Data Migration & Reporting Analyst with 3 years of IT experience spanning data migration, reconciliation, reporting, business intelligence, machine learning, cybersecurity, and full-stack development. As a **Data Migration & Reporting Analyst at Linar Insurance**, translates business requirements into analytics-ready datasets using SQL Server Management Studio (SSMS) and Excel, with hands-on experience in data profiling, validation, reconciliation, source-to-destination field mapping, and data-linking logic during the Ekusure–Bootsure platform integration, and is responsible for reporting on the migration. Brings a data science background from **Shaper** (supervised machine learning, Python, Power BI) and additional grounding in secure development practices, RESTful API design, and CI/CD automation from prior cybersecurity and full-stack learnerships. Holds a CCST Cybersecurity certification.

CORE TECHNICAL SKILLS

Data Migration & Transformation: Advanced SQL, Source-to-Destination Field Mapping, Data Profiling & Validation, Bulk Policy Imports, Reconciliation, Lookups & Data-Linking Logic, ETL-style Pipelines

Reporting & BI: Migration Status Reporting & Tracking, Power BI, Microsoft Fabric, Excel (Advanced), Power Automate, SharePoint

Data Science: Machine Learning, Statistics, Python (Pandas, NumPy, Scikit-learn), Regression, Classification, Feature Engineering, SMOTE

Languages & Databases: SQL, PostgreSQL, Python, JavaScript, MongoDB

Cybersecurity & DevOps: Threat Identification & Risk Assessment, Secure SDLC Practices, Incident Response, RESTful API Development, CI/CD Pipelines, Git/GitHub

PROFESSIONAL EXPERIENCE

Data Migration & Reporting Analyst | Linar Insurance | Permanent | Hybrid *Apr 2026 – Present*

- Responsible for reporting on the Ekusure policy migration, maintaining a daily migration tracker across 35 broker and product books, with status, owner, target date and comments for each.
- Report on premium allocation (monthly), terminations and alterations (weekly), claims, lapses, new business and product setup across broker books.
- Analyze and validate insurance datasets on the Ekusure platform, supporting product setup, bulk policy imports, and pre-validation across underwriting and operations.
- Test the Ekusure–Bootsure platform integration, executing source-to-destination field mapping, lookups, and data-linking logic across connected systems.
- Perform SQL-based data reconciliation to identify and resolve discrepancies between source files, Ekusure, and reported outputs, including ID verification, product cover-rule and intermediary-linking issues raised with brokers.
- Led migration of the team's automation stack from Google Workspace to Microsoft 365, replacing Apps Script with 3 Power Automate flows that run daily with zero manual intervention.

Junior Data Scientist (Intern) | Shaper *Oct 2025 – Oct 2026*

- Built and evaluated supervised machine learning models (regression and classification) to support data-driven business decisions.
- Developed Power BI dashboards and Excel reports consumed by cross-functional teams.
- Wrote Python and PostgreSQL scripts to clean, transform, query, and visualise structured and unstructured datasets.
- Applied data engineering practices to prepare, integrate, transform, and validate data for analytics and machine learning workflows.
- Developed and maintained data pipelines and workflows to support reliable, analytics-ready datasets.

Junior Cybersecurity Analyst | Shaper — Cybersecurity Learnership *Sep 2024 – Sep 2025*

- Completed a structured cybersecurity learnership covering threat identification and risk assessment across systems and applications.
- Applied secure development practices to reduce vulnerabilities throughout the software development lifecycle.
- Supported incident response workflows, including detection, triage, and remediation of security incidents.

Junior Full Stack Developer | Shaper — Full Stack Learnership *Sep 2023 – Sep 2024*

- Built RESTful APIs and full-stack web applications using JavaScript and Python.
- Managed MongoDB databases for application data storage and retrieval.
- Maintained CI/CD pipelines via GitHub to support automated testing and deployment.

Also: Junior Software Developer, Speccon (Aug–Sep 2025) — C#/.NET web app development. Earlier experience: Operations Trainee, FedEx Express; Administrative Assistant, Dept. of Home Affairs; Cashier & Customer Care, Cash Crusaders.

KEY PROJECTS

SME Financial Health Prediction | *Zindi / data.org / FinMark Trust, 2026*

- Achieved 89% Macro F1 Score predicting SME financial health across 4 Southern African nations, using a weighted ensemble (Random Forest, Gradient Boosting, Extra Trees).
- Engineered 30+ domain-driven features and applied SMOTE within 5-Fold Stratified Cross-Validation to handle class imbalance without data leakage.

GeoAI Aquaculture Pond Identification Challenge | *Zindi / FAO & ITU AI for Good, 2026*

- Achieved a leaderboard score of 0.9632 (60% F1 + 40% ROC-AUC) detecting aquaculture ponds from multi-temporal satellite imagery.
- Engineered 48 spectral/temporal features (NDWI, NDVI, MNDWI, SAR VH/VV) and used SHAP to identify the strongest pond discriminators.

Full write-ups available on GitHub and the Data Science Portfolio linked above.

EDUCATION & CERTIFICATIONS

Office Administration (NQF 4) — Letaba TVET College, 2013–2015
National Senior Certificate — Matsambu High School, 2011

Certifications

- CCST Cybersecurity – Cisco Certified Support Technician
- System Support (NQF 5)
- Generic Management (NQF 5)
- Business Administration (NQF 4)
- Design Thinking Practitioner (NQF 4)
